

SABIC® PP 58MNK10

PP block copolymer for Injection moulding

Description:

This grade combines an excellent stiffness with high impact resistance. It has a narrow molecular weight distribution and a low tendency to warp. Excellent flow in combination with high crystallisation speed enables outstanding processability aiming at easy mould filling and short cycle times. Due to the mentioned performance this grade is suitable for usage in several kinds of containers. The excellent high gloss level makes this material also favourable for household applications.

Health, Safety and Food Contact regulations:

Material Safety Data Sheets (MSDS) and Product Safety declarations are available on our Internet site http://www.SABIC-europe.com

The product mentioned herein is in particular not tested and therefore not validated for use in pharmaceutical/medical applications.

This grade material is UL registered under File E111275 (www.ul.com). IMDS 80775790

Quality:

SABIC Europe is fully certified in accordance with the internationally accepted quality standard ISO9001.

Storage and handling:

Avoid prolonged storage in open sunlight, high temperatures (<50 °C) and /or high humidity as this could well speed up alteration and consequently loss of quality of the material and /or its packaging. Keep material completely dry for good processing.
