

HOPELEX PC-1070U

Polycarbonate resin

General Information

Description

□ PC-1070U has higher viscosity, impact strength, tensile & flexural strength, and elastic modulus, which can be used in sheet-extrusion and stringent demand such as and goggles etc. Hopelex PC-1070U have UV stabilized ingredients to prevent degradation of final PC products from lights.

Applications

OUTDOOR APPLICATION, MULTI-WALL, SOLID SHEET

| Typical properties ¹ | | | |

Recycling

Sprues and runners can be reground with virgin resin within the ratio of 20%. Care must be taken to ensure that the regrind is free from impurities and regrind should not be used in applications where impact performance and/or agency compliance are required.
